## Newly developed wave solder bath TS 300

Our TS 300 wave solder bath is the logical development of our TS 100/200 series. It has established itself well and is now our best-selling standard wave solder bath.

### New technology:

- Higher pumping capacity than its two predecessors
  - ➔ To achieve stronger cross currents for stranded wires
- Less dirt due to open pump tube
  - ➔ Longer maintenance intervals
- Easier maintenance and shorter downtimes
  - ➔ Higher productivity

### Benefits at a glance

- Higher pumping capacity
- Longer maintenance intervals
- Easier maintenance
- Fast and uncomplicated type change
- High temperature ceramic bearings

### Optionally available

- Solder level monitoring (pan level)
- Pneumatic solder wire feed for 3 mm solder wire
- Laser splash check
- Camera flow control
- XY slide system for quick positioning
